DETAILED ACTION

1. In view of the Appeal Brief filed on 11/06/2008, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing at the end of Office Action.

Drawings

2. Drawings, dated or received on 07/26/2007, i.e. Figures 1-2 are not acceptable because the unlabeled rectangular box(es) shown in the drawings should be provided with descriptive text labels. See MPEP § 608.02 (V), and 37 CFR 1.84(n)-(o).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract of the disclosure is objected to because “(FIGURE 1)” should be deleted from the ABSTRACT. Correction is required. See MPEP § 608.01(b).
4. In the *Background of Invention of the Specification*, lines 5- 7, it is recited that “The present invention relates to a method and an arrangement for correcting an angle-measuring and/or distance-measuring sensor system **according to the preamble of the main claim**”, (emphasis added), which needs to be corrected since claim numbers and their content are subject to change during prosecution.

Claim Objections

5. Claim 15 is objected to because of the following informalities: a period --. needs to insert to the end of claim 15. Appropriate correction is required.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 8, 10, 11, 15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 8 recites “a method for correcting a sensor system selected from the group consisting of an angle-measuring sensor system, a distance-measuring sensor system, and an angle-and a distance-measuring sensor system comprising the steps of evaluating..., correcting errors..., providing for the correcting the sensor system a compensation process and a subsequent correction process; in the compensation process...using an algorithm”, which is neither (1) tied to another statutory class nor (2) transformed underlying subject matter (such as an article or materials) to a different state or thing. Further, neither does the method as claimed recite any concrete, useful and tangible result.

Claims 10, 11, and 15 depend from rejected claim 8 and therefore are also rejected.
